## Pharmaceutical ingredients for human use

Ofipharma provides the best solution to meet your specific requirements in sourcing, reanalyzing and repacking of pharmaceutical ingredients. We only work with qualified manufacturers who meet EUGMP (Written Confirmation) requirements and preferably have an ASMF-CEP for their API. For compounding pharmacies we have a line of standard packaging available.

### Unique values to meet your specific requirements

#### Global presence

With sourcing offices in Europe and China we have a strong worldwide network with reputable manufacturers and full traceability.

#### Supplier qualification program

We only approve manufacturing sites that successfully completed our qualification program. In addition our sister company, OFIDIT, performs on-site audits.

#### Retesting services

All our APIs can be sampled and reanalyzed according latest editions of world wide Pharmacopoeia.

#### Tailor-made solution (GMP).

Raw material repacking to your specific production process or requirements.
